

To the Honourable Speaker and Members of the Legislative Assembly in Parliament assembled,

**We are calling for a brighter future powered by clean energy.**

**#REPOWER  
NSW**

Mining and burning coal and gas is a long-term threat to our climate, environment and communities. We call on the NSW Parliament to stand with the NSW community and:

- **Source all our power from sun, wind, and water by 2030**
- **Phase out coal and gas-fired power and rule out new coal mines or gas fields**
- **Help affected workers and communities prepare for jobs with a future**
- **Make sure the transition is fair so everyone, everywhere has access to clean, renewable energy**

Yours sincerely,
