To the Speaker and Members of the Legislative Assembly in Parliament assembled, this petition brings to the attention of the house that:

- The NSW Government is planning to allow logging in more than 15,000 hectares of protected old-growth and high-conservation-value public forests.
- More than 29,000 hectares of previously protected old-growth forests on private land have already been opened up to logging in recent years.
- These rare and important forests have been protected for decades. They store huge amounts of carbon and provide irreplaceable habitat for many threatened species, including koalas, gliders, quolls, frogs and owls.

The undersigned petitioners therefore call on the Legislative Assembly of NSW to:

1. **Ensure no areas of forest currently protected will be opened up to logging.**
2. **End the remapping and rezoning of old-growth and rainforest on public and private land.**
3. **Conserve native forests to protect biodiversity, store carbon and provide new tourism and recreational opportunities.**
